Basic English (British American Scientific and Commercial English) is an English-based controlled language created by linguist and philosopher Charles Kay Ogden as an international auxiliary language, and as an aid for teaching English as a simplified subset of regular English. It was presented in Ogden's book "... To thrive in this age of the unexpected, companies must leverage data, AI and machine learning (ML) to create customer loyalty, automate business processes, and innovate future ideas. But, the demand for data has outpaced our ability to solve our existing data problems—the copy and paste method has only made things worse.
